Known Issues

- After re-installation of the Editor, the Voice name may occasionally not appear on the Media Bay windows of Cubase. If this is the case, execute "Refresh" or "Rescan".
- No sound may be produced when you use Editor for the Instrument track and change the Voice of the track to one of the HALionOne via the Track Preset button. If this is the case, set the VST Instrument of the track to "without Instrument" then select the Voice of the HALionOne, or select the Voice of a VST Instrument other than the HALionOne, then select the HALionOne's Voice via the Track Preset button.
- The Editor may launch in the OFFLINE status or "Port Open Error" may appear when you: 1) select the MOTIF XS Voice via the Media Bay, 2) create the Instrument Track on Cubase, and 3) start the Editor. Even if such a situation occurs, you can use the Editor by clicking the

ONLINE/OFFLINE switch to set the status to ONLINE.
